THE HOT2000® HOTEL SOFTWARE

Dear Sir or madam,

HOT2000 is a business management software that assists the hotel to efficiently track its data and information. It is a user-friendly, functional and affordable hotel accounting software System that runs on your network of computers thus enabling the core departments of the hotel to efficiently share information.

SOME TASKS HOT2000 CATERS FOR

a. Tracking of guests' accounts and generation of various guest reports.
b. Monitoring of Room status and generation of a host of room reports
c. Printing of cash receipts for guest cash payments at the front office.
d. Generation of Guest Bills (transaction details) on checkout
e. Generation of Total Sales made on a daily basis
f. Generation of various History Reports
g. Generation of Company Invoices and Statements
h. Generation of Cashiers shift report (Front Office)
i. Generation of Outlet Summaries or Control Sheet (Restaurant)
j. Generation of Profit and Loss report
k. Generation of many other management reports

Please find attached additional information. We shall be delighted to hear from you.

Yours faithfully,

Andrew Mordi
Vice President
